Notes

OpenSites Web Development Platform

Wholesale Pricing for Web Designers and Developers

Product/Service	Minimum Hosting Level <small>(Note 1)</small>	Price (US\$)
<p>1. The Minimum Hosting Level refers to the lowest Hosting Plan required to host an OpenSites website with Voloper. To determine the Hosting Plan you require for any site, simply pick the highest level of any of the chosen site modules. Please note the Hosting Plans are designed to provide ample web space, bandwidth and database space for typical websites with the selected modules. Sites with very large amounts of uploaded content, or very high traffic levels, may require a Hosting Plan above the Minimum Hosting Level indicated, and/or additional webspace or bandwidth. Please see the Hosting Matrix for further information.</p> <p>2. The charge for the OpenSites Engine - required for each website - is \$300. This charge is waived for sites hosted with Voloper. Should a site be launched at Voloper and subsequently transferred to another host, the OpenSites Engine fee will be payable before the site is transferred.</p> <p>3. Included / Additional Pages are individual content pages, created and managed through OpenSites. Many modules - such as the FAQ or Virtual Catalogue modules, for example - spawn multiple pages in response to website users browsing their content. These are not chargeable as Additional Pages - only the page (or pages) in which the module is inserted count towards the limit of Included / Additional Pages.</p> <p>4. Campaign Manager includes an initial credit of 500 Campaign Emails. Additional Campaign Email credits are priced separately. Sites not hosted at Voloper are subject to monthly email limits. See Hosting Matrix for further details.</p>		
All Prices Exclude GST and PST (payable when sold in Canada)		Effective 22 February 2010 E&OE.
