Photo Sweet 1.0 Main Features

Four Modules in One: Photo Sweet unifies four image-related modules into one. From a single database of photos, Photo Sweet 1.0 allows you to offer site visitors a picture gallery, an ecard and postcard mailer, and horizontal and vertical image scrollers.

Easy Gallery Configuration: One page allows you to manage general gallery settings such as layout, border and popup settings, picture and thumbnail heights, website and email setup, notification messages, and stamp display options.

Attractive Image Display: Images can be displayed in a definable pop-up window or on page via a "lightbox".

Image Scrollers: Scrollers allow you to scroll images from your database in either a horizontal or vertical fashion in your web site, giving your site a modern, dynamic look-and-feel. Control the speed,

Unlimited Galleries and Sub-Galleries: Create an unlimited number of galleries and sub-galleries and organize your images under them.

Stamps: Ecards and postcards can be made more fun with a "stamp" feature.

Search: Photo Sweet provides a quick and easy-to-use search dialog, allowing site users to search for images based on descriptions.

Gather Marketing Data: Photo Sweet keeps track of which users are sending which photos and to which email addresses. Over time this tracked information can provide valuable marketing insights into

Import/Export: If your site has an extensive picture collection, you can use Photo Sweet's import function to upload pictures and gallery structures via a simple Excel spreadsheet file. An export function allows you to export your gallery structure and links to images into a spreadsheet file.

SEO: Photo Sweet allows you to directly configure Search Engine Optimization information like keyword/description meta tags, title bar text, and create a customized descriptive URL for each gallery page.
