

**vBlog v3.0** is a fully extensible web log (blog) publishing solution for small and medium sized businesses as well as for large enterprises. This powerful and easy-to-use blogging tool allows you to publish your content online effortlessly and effectively, allowing you to build your online brand and strengthen stakeholder relationships.

vBlog v3.0 has everything you need to get started in online content management, from the front-end interface that displays your blog posts, comments and trackbacks, to the robust Administration back-end interface that completely handles your content.

If you are looking for a blog publishing solution that incorporates best-of-breed technologies and strategies, vBlog v3.0 is by far the most powerful and easy-to-use system available in today's market. Get all the features of popular blogging services but keep your content under your domain and under your control. Why subject your content to the vagaries of another blogging services Acceptable Use Policy?

## **vBlog v3.0 Main Features**

**RSS Syndication:** Build a loyal audience through a built-in RSS Syndication feature.

**Trackbacks:** A Trackback System allows you to keep track of other blogs' comments about your entries and helps your blog readers follow conversations between your blogs and other weblogs. Trackbacks

**Tags and Categories:** Blog posts can be organized under categories or indexed with a multi-word tagging system. On front page of the blog you can have a tag cloud that displays tags based on usage.

Add New Post

**Spam Filter:** A built in spam filter can reject comments based on too many URLs in a comment or when comments contain words that match a customizable banned words list.

**CAPTCHA:** vBlog supports the CAPTCHA system which helps prevent bots from posting spam.

**Ping Server:** vBlog supports pinging content aggregators like Technorati or Weblogs.

**Social Bookmarking:** Blog posts include clickable icons that allow the user to automatically add the permalink to a social bookmarking service (like Digg).

**Sticky Posts:** Posts can be flagged as "sticky" ensuring they will always appear at the top of the blog main page.

**Excerpts:** Create Excerpts on blog posts that provide more accurate summaries.

**Comments:** You can set your blog to allow or disallow comments. Commenting can be open or moderated.

**Collective Blogging:** vBlog makes it easy to add as many authors as you wish to your blog.

**Related Posts:** Configure how posts generate and display related posts.

**SEO:** Post pages allow you to directly configure Search Engine Optimization information like keyword/description meta tags, title bar text, and create a customized descriptive URL.
