

Universal Feed Reader 2.0

Universal Feed Reader is a comprehensive RSS feed management application service for all your Web projects. This powerful and easy-to-use management tool allows you, the Site Administrator, to securely manage, actively track and accurately check all your RSS feeds in one place. You can manage your RSS feeds independently of your website.

The Universal Feed Reader v2.0 module features full integration with our OpenSites and Online Business Solution packages, allowing you to provide a full-

service web offering for your clients and site visitors. If you are looking for an RSS content management solution that incorporates best-of-breed technologies and strategies, Universal Feed Reader v2.0 is by far the most powerful and cost-effective system available in today's market.

Universal Feed Reader v2.0 has been created to offer a fully configurable, feature-rich solution for site visitors, clients and service professionals. It has been designed to be intuitive and easy to use, even for the novice Web user, saving you hours of time and giving you more control over your web project.

Universal Feed Reader v2.0 Main Features

Advanced Integration with OPML and RSS: OPML and RSS information is fully integrated with the Universal Feed Reader module, allowing you to provide full RSS capabilities to your audience, as well as easily manage link transfers between other link content management systems.

Import and Export Capabilities: The Universal Feed Reader v2.0 allows you to save all your link content information on your local drive, and gives you the capability of importing OPML, and full database information through a full-featured Import Menu.
