

The Virtual Catalogue v4.0 is for new or existing sites that want to add product presentation capabilities to their Web presence but do not require the power of an e-commerce solution. Virtual Catalogue is a powerful product management solution that offers a wide range of out-of-the-box features, and is nimble and flexible enough to be up and running in no time, avoiding the costly development process.

Provide your site visitors and potential customers with product information, including product inventory, pricing, supplier information, and much more! The Virtual Catalogue's Front-End interface, which is what visitors see when they visit your site, can be seamlessly integrated to new or existing sites.

The Administration Panel, which is only available to you, the site administrator, is easy to learn and provides you with the tools to effectively manage your online inventory.

Virtual Catalogue Main Features

Categories: Create an unlimited number of categories and subcategories and list goods under them.

Listing Page: Every item can be displayed on its own listing page. A listing page allows you to present each item in an attractive, informative, and detailed way.

Images: Every item can have an unlimited number of images along with automatically generated thumbnails.

Customization: Information presented on a listing page is easily customized and expanded using a back-end extra field editor. You can create your own text fields, check boxes, radio buttons, and a whole lot more.

Category

This is the Category Browser. The links immediately below will tell you what category level you are currently at. The categories that are listed are those that fall under the current category level. If you want to go down another level click on View Sub-Categories for ... If you want to modify a listed category click on its name. To add a new category, click on Add New Category.

Main Category :

Category	Sub Category	
Books	View sub categories for Books	
DVD	View sub categories for DVD	
Jewelry	View sub categories for Jewelry	
Music	View sub categories for Music	
Shoes	View sub categories for Shoes	

[Add New Category \(at this level\)](#)

Search: Virtual Broker supports a configurable advanced search dialog box that allows page visitors to on keywords, price ranges, location, and type. On the back end you can configure your own price ranges and listing types.

Import/Export: If you can export your current catalog into a spreadsheet table, you can easily import it into Virtual Broker. An export feature allows you to extract key data for use outside of Virtual Broker.

SEO: Listing pages and category pages allow you to directly configure Search Engine Optimization information like keyword/description meta tags, and title bar text.
