No problems at all with either. Have a kitchenaid 22cubic fridge. Its about 5 or 6yrs old now,,, and has worked perfectly from day one! Bought it at sears clearance centre in Brampton, for like \$800 marked down from \$1900. One of my better purchases...

## Web Board v3.0 Main Features

**Categories, Forums, and Posts:** You can have an unlimited number of categories, forums, and posts.

**Multiple languages:** Setup boards in different languages.

**Private Messaging:** Post private messages to forum members.

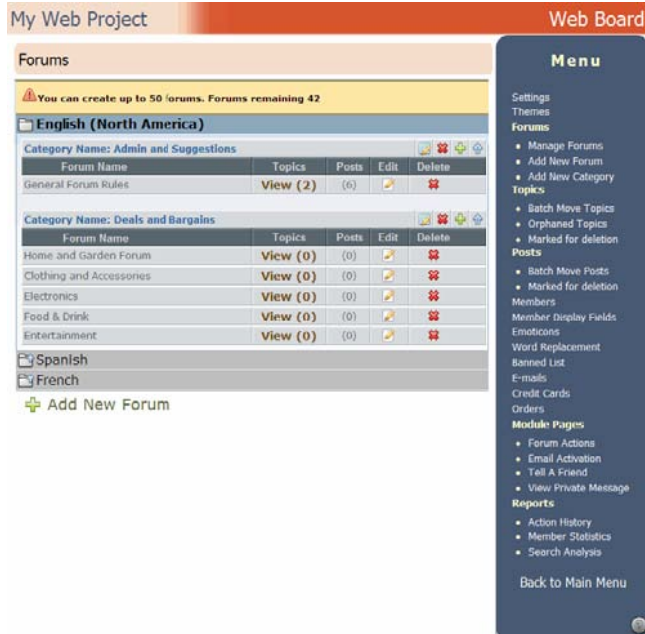

**Print Friendly Pages:** Users can click an icon and get a web board posting in a printer friendly format.

**Guest Posts:** You can allow only registered users to post or you can have your board open an allow guest posts.

**Member Types:** Trusted user can be promoted to moderator status and handle board administration duties.

**Sticky Topics:** Board posts can be promoted to sticky topic status and always remain at the top of a message listing.

**Buddy and Ignore Lists:** Users can create buddy lists (lists of posters the user wants to read) and ignore lists (posters the users does not want to read).

**CAPTCHA:** Web Board provides a CAPTCHA system that challenge posters, preventing automated scripts from posting ads on the guestbook.

**Hot Topic Flag:** Posts can be automatically flagged as "hot".

**Ban IP Addresses:** Take care of problem users in a snap by banning their IP.

**Paid Message Board Feature:** You can configure your message board to accept PCI-compliant credit card orders for membership privileges.

**Pre-Set Themes:** Get your message board up, running, and looking professional using one of Web Board's built-in theme options.

**Swear Filter:** Web Board comes with a pre-configured swear filter (featuring all the popular swear words). You can edit and add new items as you see fit.

**BBC Code Support:** Users can format their posts using BBCode (Bulletin Board Code). BBCode is a markup language used to format posts in many modern message boards.
